PROFESSIONAL SUMMARY

Software Engineer with 5+ years of experience building scalable fintech applications using React, Vue.js, and Next.js on the frontend and Node.js with Express.js on the backend. Experienced in leading teams, architecting micro-frontend systems, and driving performance optimization with Core Web Vitals. Skilled in SSR/SSG, state management, i18n, CI/CD automation, application security, and delivering accessible, high-performance interfaces at scale. Proficient in building GraphQL and REST APIs with PostgreSQL for robust data management.

WORK EXPERIENCE

WSD

Germany · Remote

Software Engineer L3 — Feb 2026 – Present

- Lead engineering across multiple products, mentoring 4+ developers via code reviews and pair programming
- Architect micro-frontend modules using Vue, React, and Next.js with SSR/SSG for enterprise fintech platforms
- Integrated AI-assisted workflows with Claude AI and Cursor, reducing feature delivery time by ~30%
- Optimize Core Web Vitals through lazy loading, code splitting, and caching across critical user flows
- Publish private npm packages and maintain a shared Storybook component library for cross-project reuse
- Drive sprint planning in Jira — scoping epics, writing stories, and facilitating Agile/Scrum ceremonies
- Maintain CI/CD pipelines automating build, test, and deployment for safer production releases

Frontend Developer — Oct 2024 – Feb 2026

- Built Vue-based fintech apps with mobile-first architecture, Pinia state management, and vue-i18n localization
- Translated Figma designs into pixel-perfect, cross-browser interfaces across all major platforms
- Delivered WCAG-compliant accessibility and Intersection Observer for performance-optimized lazy rendering
- Conducted dependency audits and vulnerability assessments using npm audit and Snyk
- Integrated OAuth/JWT authentication flows with Keycloak for secure role-based access
- Established code review workflows, Sentry error tracking, and documentation adopted by the frontend team

Ixora Solution Limited

Dhaka, Bangladesh · On-site

Software Engineer — Jan 2023 – Aug 2024

- Engineered resource management, project planning, and lead capture systems using React.js with Redux
- Developed real-time dashboards with Socket.io, drag-and-drop scheduling, and CRM-integrated tools
- Built GraphQL and REST APIs with Node.js, Express.js, TypeORM, and PostgreSQL
- Identified and resolved critical performance bottlenecks, improving response times and team output

Software Developer — Sep 2021 – Jan 2023

- Built a browser-based video creation platform using React.js and Remotion with 4K export capability
- Engineered a real-time preview engine with Lottie animations, text overlays, and QR code support
- Created reusable video components with Storybook documentation for dynamic content pipelines
- Deployed rendering pipelines using Docker, Kubernetes, and ArgoCD; monitored with Datadog and Sentry
- Drove iterative feature improvements through CI/CD automation and user analytics feedback

Business Technology

Dhaka, Bangladesh · On-site

Frontend Developer — Apr 2020 – Aug 2021

- Developed responsive web interfaces using HTML, CSS, JavaScript, and React for client-facing products
- Translated Figma and Adobe XD designs into pixel-perfect pages with cross-browser and mobile support
- Integrated REST APIs for dynamic data rendering; improved site performance and page load speeds
- Maintained Git-based workflows with branching strategies, pull requests, and clean code practices
